

Monitor and Improve True Speed Perception

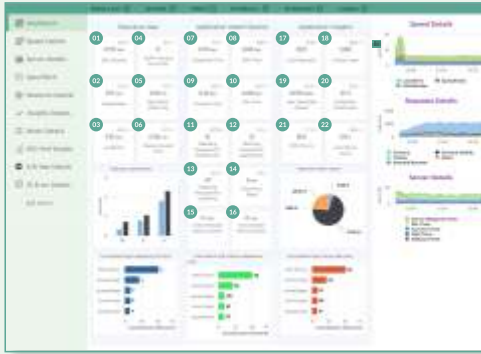

A Real User tool to identify Site Speed
Issues and improve User Experience.

Know Gemini

Monitor. Detect. Alert.

Benchmark your real user speed and get notified about speed degradation and traffic drops in real time. Take corrective actions based on the automated alert analysis, which pinpoint the probable areas of concern.

Monitor.

The dashboard allows 'One View' of all relevant application and user performance parameters. The view helps in tracking and monitoring of various vital statistics and alarms. Every box on the dashboard shows the improvement or degradation with respect to the last week data same time.

Detect.

Detecting a problem is half solution found. And Gemini has the capability to detect Speed Degradation, Users Bandwidth, Landing Pages, Referrals, Javascript errors, scraping attempts and many other parameters.

Alert.

Whether it is Slowest Pages, Resources, Root Cause Analysis, Downtime/Traffic Minutes Lost, Scraping Ips or any other problem, the tool sends an automated alert. Take corrective actions based on the automated alert analysis, which pinpoint the probable areas of concern.

Gemini – Features at a Glance

Users Perception as Speed

Monitors and benchmarks real user speed with page painting numbers and notifies for any degradation.

Reporting Broken Page Deliveries

Monitors real user Javascript errors in browsers and improves page abandonment rate by fixing them.

Gemini – Benefits

Increased Conversions

A fast website can boost conversions and generate more revenue.

Better Engagement

Users are more likely to browse than to bounce from a better performing site, increasing user engagement.

Improved SEO

Google penalizes slow websites. Speeding up your site on performance core web vitals will help with SEO..

Customer Delight

Lesser javascript errors will make the user experience a pleasurable one.

Great First Impression

If your website loads quickly, it's instantly perceived as professional and reliable.

Site performance matters. We can help.

The company offers its Professional Services to various clients, where it works on analysis, base lining speed and implementation of various performance optimization recommendations. Epsilon Delta aims to achieve minimum 30% improvement in the speed. Our clients are extremely happy about our performance consulting engagements. About 70% of our clients have repeated our engagements.

Testimonials

Learn why we are the Perfect Choice as told by our Customers

We switched from NewRelic RUM to Gemini and have been using it for nearly a year now and very happy with it. What we love about Gemini, it gives real time alerts for the performance degradation. This has helped us identify the problem areas and resulted into nearly 30% performance gain across all the key pages of the website.

Mr Rupesh Kumar - Director of Engineering
Big Basket

The Gemini tool is thoughtfully designed for the modern web powered by SPAs and Microsites. The best part, it is really a plug and play solution and gives you an unsampled and accurate view of what your users are experiencing.

Mr Anshul Agrawal - CTO
